

## Create Graphics with Canva

Canva is an online graphic design tool pre-loaded with thousands of templates to spark your creativity.

Using Canva makes it easier than ever to knock up stunning visuals in no time. From event flyers to social media posts, Canva helps you design everything simply and efficiently without needing extensive graphic design experience or complicated Adobe programs.

Canva offers a variety of pre-made templates to choose from, including Facebook and Instagram posts and banners, flyers, cards, logo design and way more. Using the pre-made templates, you can be sure that your content will perfectly fit your desired image location.

- Canva is easy to use with loads of professional templates available.
- It is free to use (although paid versions are available).
- Canva is now connected to Pexels and Pixabay so you can search and use free stock images that are copyright-free for most usages.
- You can set your brand colours (up to three in the free version) to ensure your colours are consistent.
- Canva projects are easy to share with other people via a link, so multiple team members can work on the same project.
- Projects are autosaved in your Canva account so you are unlikely to lose a project if your computer or web browser crashes.
- You can download different file types for different uses. For example, PDFs for printing (add crop marks) and PNG for most other uses.

### Club flyer templates
